About Us

VISFES is a leading specialist in the swimming pool and aquatic system industry, offering a comprehensive range of services from residential pools to large-scale aquatic centers, waterparks, and water features. As a Cutting-Edge Water Specialist, **VISFES** consistently brings the latest innovations and technologies to deliver pool systems that are more efficient, modern, and sustainable.

We are also a pioneer in the development of Smart Aquatic Centers in Indonesia, combining advanced global technologies with in-depth research conducted by our dedicated team. supporting national economic growth and accelerating technology transfer within the evolving aquatic industry.

VISFES is powered by a highly qualified team. Every project execution is tailored to meet technical specifications, economic feasibility, and client needs in a holistic way. Our commitment extends beyond installation—providing after-sales support, maintenance services, and product warranties to ensure long-term project success and client satisfaction.

Local Pride

VIVAQUATICS, as a trailblazer in Smart Aquatic Center development, also carries the spirit of local pride. Drawing inspiration from the latest global technologies and backed by extensive research, **VIVAQUATICS** strives to maximize local content in every product it offers.

Beyond contributing to the local economy, the team at **VIVAQUATICS** is united by a shared goal of knowledge transfer, helping to fast-track the integration of cutting-edge technologies in this rapidly growing field.

Pool Systems :

VISFES delivers integrated pool system solutions tailored for both competition and leisure pools. From advanced filtration and circulation to precision water treatment and hydraulic design, our systems ensure optimal water quality, energy efficiency, and long-term reliability. Engineered for seamless operation and minimal maintenance, VISFES pool systems are trusted across public, private, and institutional aquatic facilities.

Field Of Play :

VISFES supplies certified Field of Play components that meet international competition standards, ensuring safety, accuracy, and optimal performance for athletes. From starting blocks and lane ropes to turning panels and deck equipment, our solutions are engineered for durability and competitive integrity.

Water Features :

VISFES creates bespoke water features that combine aesthetic appeal with functional precision. From architectural fountains to cascading waterfalls, our systems are engineered with advanced control technology and high-quality materials, ideal for public spaces, resorts, and private estates.

Water Polo Accessories :

Our water polo systems are designed for elite performance and reliability. VISFES provides goals, field lines, referee platforms, and all essential accessories, built to international specifications. Perfectly suited for training and tournaments alike, with fast setup and robust design.

Moveable Bulkhead Systems :

Our moveable bulkhead systems offer flexible pool zoning for multi-sport use, enabling quick reconfiguration of the pool layout. Built with precision engineering and corrosion-resistant materials, VISFES bulkheads ensure structural integrity, ease of movement, and long-term performance.

Moveable Floor Systems :

VISFES moveable floor systems provide adjustable-depth flexibility for pools, allowing for rapid adaptation between training, competition, therapy, and beginner use. Operated via automated controls, our systems ensure smooth elevation changes, safety compliance, and operational reliability.

Counter Current Systems :

VISFES offers high-performance counter current systems ideal for resistance training, rehabilitation, or compact swim spaces. With customizable flow rates and smooth hydrodynamics, our systems create an endless swimming experience tailored to every user's skill level.

Altitude Training Systems :

Enhance athletic conditioning with VISFES Altitude Training Systems. Designed to simulate high-altitude environments, our solutions support VO_2 max improvement, endurance training, and recovery optimization. Fully integrated with climate control and air composition monitoring for precise performance outcomes.
